DOUBLE FRAGRANT VIOLETS

MARIE LOUISE

This is undoubtedly the Violet par-excellence of all the double varieties because of its fragrance, strong growth, productiveness, keeping qualities, and hardiness. It has a fine dark mauve color, and the leaves are a rich glossy green. The flowers of this variety are raised by the million in Rhinebeck.

FARQUHAR

A selected type of Marie Louise with slightly larger flowers and a tendency to bloom a little earlier.

MRS. J. J. KETTLE

A new introduction with exceptionally large double light mauve flowers. A compact grower.

LADY HUME CAMPBELL

A free flowering double Violet with long stems and light mauve blooms.

SWANLEY WHITE

The best and only pure white Violet. Gives large double flowers, especially when warmed by the spring sunshine. It is not an easy doer and seems to have an off and on year. Growth is small and compact without many runners.

MRS. JOHN JACOB ASTOR

Same type flower as Marie Louise but a dark rosy mauve in color. A most unusual Violet for your collection.

RUSSIAN DOUBLE

This is a variety much sought after because of its extreme hardiness under all conditions. Dark mauve flowers of fair size.

RUSSIAN SINGLE

Very hardy and free flowering. Flowers of fairly good size and medium Violet in color. Recommended for planting in rockeries, etc.

"MRS. DAVID LLOYD GEORGE"

Left above-Detail showing double center.

Right above-Actual size of blooms.

SINGLE FRAGRANT VIOLETS

MRS. DAVID LLOYD GEORGE

A new single Violet with Princess of Wales parentage. Very large fragrant flowers on long stems, the flower being distinguished by its multi-colored center. Many gold and silver medals awarded to this variety attest its standing as the best single Violet of today. (See picture above)

PRINCESS OF WALES

Until the advent of Mrs. David Lloyd George this was easily the most popular single Violet. Has long stems, good foliage and the true Violet color. (See picture on page 4)

FREY'S FRAGRANT

A variety with a very compact habit of growth, rich glossy leaves and flowers of deep purple on medium length stems. It seems to belie its name of "Fragrant," but is a good sort to grow in a house with other flowers, as it stands more heat than the Wales type.

GOVERNOR HERRICK

A well known prolific blooming variety of Violet with very vigorous growth which makes it somewhat subject to disease. Short stems and flowers not too large. Fairly fragrant. Recommended where quantity of bloom is an object.

PRINCESS MARY

This is the finest of all new Violets and has received the R. H. S. Medal in England, where it originated. It is a "double-single" of remarkable deep color and otherwise having all the free flowering and good growing habits of Mrs. David Lloyd George.

Princess Mary will be sold this year only in conjunction with orders for other fragrant Violets. No orders for more than 10 plants accepted. Divisions or plants \$1.00 each.

Want Cultural Instruction for Violets?

Then send \$1.90 for copy of illustrated book "Practical Violet Culture" by Nelson Coon, or ask for free prospectus.

24 Page Booklet sent for 25c in stamps which amount will be refunded on first order.
